August 2013

After Parentage court date

Visitation with father caused Madeline to display sexual signs both physically and behaviorally, which indicate probably sexual abuse; Child was 7 months of age

Child was with the Kramer family after the mother was bantered by them and Bob Steele after parentage was established at the bureau county courthouse, claiming in a bullying, and provoking nature, that they were taking the child till Monday and there was nothing Julia could do about it. At the time Julia tried to trust them and agreed to let them have that visit, but this time when the child returned to Julia, who was accompanied by Bill Crossman, Madeline was showing sexual based trauma.

Madeline's vagina showed signs of trauma and appeared to be tampered with. It appeared penetrated, swollen and infected. Her vagina was inflamed, bulging and swollen insides which were protruding visibly compared to normal. She had discharge and fluid draining from her vagina as well. It was clear something was wrong, and it didn't seem normal as shed never appeared that way on her genitals ever before. The look of her genitals are normally subtle, and unnoticeable, even hidden from sight. But now her vagina appeared open, inflamed and infected plus jumping out at you with a visible problem.

My friend Bill Crossman was a character preset during the mother discovering the child's vaginal trauma.

The mother was at Bill Crossman's house when she got her daughter back and she changed the child in the kitchen, which was off of the living room where Bill and Julia were, but Bill stayed while Julia changed Madeline. Julia has spent time with Mr. Crossman at his residence before with Maddie, and has also changed her several times there in the past without any problems or expression of noticing abuse signs. Bill never saw Madeline's vaginal region. He just heard the mother express the abuse signs to Madeline's genitals that were evident upon diaper change. Bill stated Julia was a good mom, and dedicated but that he hoped the abuse was not true.

Following physical genital trauma, child exhibits prolonged and disruptive sexual behavior

Madeline was now masturbating by humping and squeezing her legs together to create pressure on her genitals. It was an obvious new behavior which was not present before the visitation. When the child came back, this said behavior, the child was exhibiting all the time. She was creating sexual stimulation on herself during when it was time to eat, play, sit, nap, etc. literally during all her normal baby activities which shed normally do, she was masturbating all the time instead. So there was a noticeable behavioral and sexually based disturbance caused by the father's visitation, being the only causative variable.

Mom called PRC and Took Madeline to be seen at Ottawa regional Hospital about the genital trauma

I called pediatric resource center in Peoria IL, the day following sighting Madeline's genital trauma at return of fathers visit. Mom explained to them Madeline's symptoms and expressed she wished for Madeline to be seen by a doctor. Mom says daughter sings were clearing up while in her care so wanted her sings to be documents before going away completely in case it was some kind of abuse. The PRC said they couldn't get Madeline an apt until later that week about 5 days away and suggested they stay in touch with Ottawa regional, where Madeline's doctor was and to have mom bring child there. Mom brought child to Ottawa regional and was seen by her pediatrician there. The doctor who examined Maddie stated she was under qualified, underequipped and undereducated to evaluate and specify signs of sexual abuse in infants. She stated with her level of specialty she could only list the sings as a diaper rash but that didn't mean it's not abuse. The doctor stated shed call DCFS which she never did, and afterwards quit working at that hospital.

acting out
sexually

02/20/2015

Visitation proves to be morally unhealthy for the child. Upon return from visitation, Madeline shows sexually excessive, inappropriate and masturbating behaviors-

The father fulfilled part of his visitation today, since his self-employed scheduled interfered with fulfilling the whole visit. The mother retrieved the child from dad at 3:30 pm.

Upon Return, Madeline was frequently masturbating. Julia asked her to stop several times and gave her activities to try to change her focus but the child acted resilient and intent on masturbating. The child began trying to attempt touching her crotch in secret so Julia couldn't see. Julia asked the child why she was doing that and Madeline simply replied, "daddy."

Madeline also stated that Grandma was yelling that day.

Later we went to eat and Madeline was persistently trying to touch hers and my boobs in public, which she normally doesn't do, and its embarrassing. She was doing it in an intimate nature; rubbing/ stimulating fashion.

I have witnessed her dad do this to her and also the child coming home from dads and when getting ready to go, talking about him touching her boobs and her not wanting him to. Secondly, she never knew the words boobs, before a visit with her dad, in which afterward she had knowledge of her boobs and the word boobs.

Later at home, Madeline was trying to press objects on her vagina through her clothes, and rubbing them on her crotch, and trying to do that to my crotch. It's clear the visitation is teaching her these things and proves to be morally unhealthy on her wellbeing. Madeline normally doesn't do any of this, when she is solely with me, and without having to go on unsupervised visitation with the dad.

06/28/2015

Showing fear of father

12

Child acts fearful of her father. Father selfishly can't put his daughter before himself for a supervised visitation

Mother was giving father a supervised visitation due to fearing her daughter emotional, metal and physical safety while alone with the father. This day The father opted to have a supervised visitation, offered by the mother, at Guitar Junkyard in LaSalle Il. The child acted rather fearful of the father, and Also the father didn't choose a very child friendly place. Around this time the child frequently would run and hide upon seeing her dad, genuinely seeming afraid. The father tends to put himself, before the child obviously. Later the mother Julia suggested they leave, go for a walk, get ice-cream for Madeline and take her to the parl for the rest of the duration of that visitation. It's said that the father had shown later that day. On the walk to get Ice cream the father acted annoyed by the child, and was shewing her across the road in an annoyed fashion as well as teaching the child about killing, by killing ants, and telling her that's what kill meant. whicl seemed rather unnecessary.

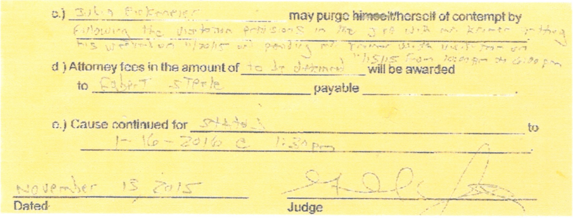
Court date Ottawa court house
Judge Michael Charles Jansz Ruled me in contempt of court for denying Mr. Kramer visitation without enough proof from my witness Gordon Pearson and Doctor Sangita Rangala that abuse was most likely taking place. Sangita Rangala is a first class doctor who says that 99% of child sexual abuse cases the child doesn't show physical symptoms, rather they are more emotional and behavioral, and we were going to have her list what they were, and me and my witness Gordon Pearson testimony of what her behaviors and reactions emotionally were. Then re-question Rangala to see what her expert opinion was if these were Symptomatic and cause for further concern. As I was looking to get supervised visitation to protect the child from the traumatic side effects she was having form being with the father. My goal here isn't to persecute the Father which would be impossible obviously, it's just to protect the child from enduring what she has been going through unfairly due to it not serving her wellbeing, or best interest, and if in fact it is sexual abuse, then her future welfare is being damaged unless something is done. Which I was trying to do. We were not prepared but for some reason my attorney let us proceed with trial. Judge said I can purge myself of contempt by following the visitation order of 4-24-14 Joint Parenting Agreement

The JPA states: The father shall have visitation every Thursday from 10 am - 6 pm and every other weekend from Thursday at 10 am to Sunday at 6 pm.

It also says custodial parent must also allow non-custodial parent first right to serve as babysitter when they are not able to be present with the child during their time with child.



c.) Julia Pickenmeier may purge himself/herself of contempt by following the visitation provisions in the JPA with Mr. Kramer getting his weekend on 11/20/15 and pending Mr. Kramer visits visitation on 11/15/15 from 10:00 am to 6:00 pm

d) Attorney fees in the amount of to be determined will be awarded to Robert Steele payable ________.

e.) Cause continued for status to 1-16-2016 @ 1:30 pm.

November 15 2015
Dated

Judge

LINE 5.13 of JPA 4-24-14

> 5.13 Whenever possible, each parent shall allow the other parent the first opportunity to serve as a "babysitter" while the child are in their respective possession and it is necessary to obtain child care services.

November 15, 2015 Sunday (first visitation day since court)

MADELINE SHOWING GENITAL PAIN AND DISCOMFORT IMMEDIATELY AFTER VISITATION

Kevin's visitation time happened from approx. 11:00am 7:15 pm
We met at Peru police station, Kevin picked her up at 11 am, we met back up at police station where he returned Madeline to me at 7:15 pm.

Symptoms:

1. When Madeline got home she was crying and saying it hurt when she'd go to the bathroom #1 in diaper and potty.

2. She would stand up and stop peeing and say ow ow ow while grabbing at her privates.

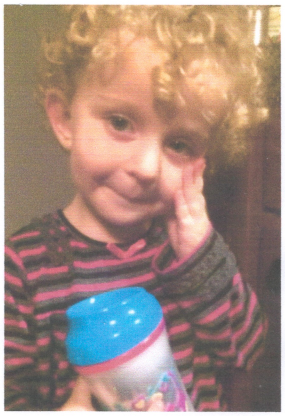
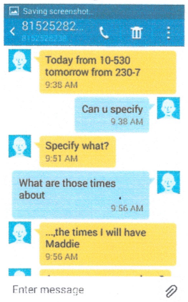
11/20/2015

Father denies Mom ROFR during the father visit despite him working a vast majority of his time with the child. He left the child with his parents a majority of this four-day visit, and that caused the child to suffer emotionally as she was away from both parents, her main caregiver, and her visiting one, an unnecessarily long amount of time. This was the wish of the father.

Kevin stated hed bring the child back to me when he had to go to work this evening, but he didn't, instead he left the child with his parents, which is going against the ROFR in our court order. I offered to watch Madeline when he needed care. Kevin is disrespectful to Julia and Maddy in that he knows the child is safest and well taken care of with Julia, and has also stated the child is unsafe with his mother. Kevin himself says his mother is dramatic, hostile and creates an unhealthy atmosphere for Madeline. By Kevin leaving Madeline with his parents, he is deliberately placing Madeline in the way of harm, according to his own words. Kevin continued to deny the child the right to return to Julia, who is her safety and where her home is at. The father had a busy work schedule, worked bar shows into the night and days for several hours at a time over the four-day visitation span. He didn't allow Julia one time to watch, visit with, see or talk to Madeline. He sent a picture of Madeline to Julia, of what she looked like on the visitation. In the picture, the child but she appears emotionally distraught due to the effects the father poor choices are having on her. The father shows blatant disregard for the child's wellness or best interests.



Julia asked Kevin to work with her, and stick to the original plan of Julia watching Madeline while Kevin worked. Kevin made it clear that his actions, for Madeline were a deliberate attempt to get revenge on Julia, and said Julia deserved this. Julia was suffering at the expense of the hurt her daughter was suffering by this as clearly shown in the picture. The father seeks revenge on the mother by hurting the child and or ignoring or neglecting her wellness.



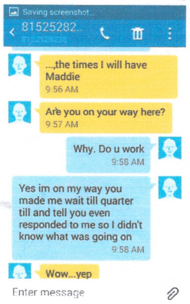
Today from 10-530 tomorrow from 230-7
9:38 AM

Can u specify
9:38 AM

Specify what?
9:51 AM

What are those times about
9:56 AM

...,the times I will have Maddie
9:56 AM



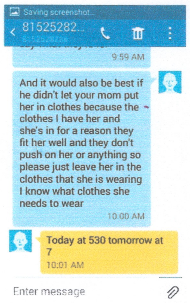
...,the times I will have Maddie
9:56 AM

Are you on your way here?
9:57 AM

Why. Do u work
9:58 AM

Yes im on my way you made me wait till quarter till and tell you even responded to me so I didn't know what was going on
9:58 AM

Wow...yep



9:59 AM

And it would also be best if he didn't let your mom put her in clothes because the clothes I have her and she's in for a reason they fit her well and they don't push on her or anything so please just leave her in the clothes that she is wearing I know what clothes she needs to wear
10:00 AM

Today at 530 tomorrow at 7
10:01 AM

Here Kevin clearly states the times he works, and the times he is free to have Madeline over a two-day span.

11/21/2015

Father denies Mother ROFR and neglects the best interests of the child
Kevin worked during this day, and also had visitation with Madeline. He left the child at his parents' house a good portion of this day and refused to allow me an opportunity to serve as babysitter.

11/22/2015

Visitation caused child to be fearful, lack of appetite, genital redness, swelling, foul fishy odor, and a white substance on genitals.

Madeline came home to me from visitation with her dad, this evening. At the exchange, Madeline was unusually fussy and Kevin explained she hadn't napped and was very tired.
Upon Madeline's return, **she immediately mentioned** ***she took a shower with daddy.***

Madeline also didn't have an appetite. At dinner, she wouldn't eat, and only gagged up when she did try to take a bite

Madeline had an unusual and foul smelling odor coming from her genitals: the smell unlike any smell I had smelled on her before, that has come from her, or any baby products.

Madeline had a strange chunky, white substance on her genitals: as visible at diaper change, there was a rash and an unknown white substance that looked like lubricant or cooking oil or even semen. (nothing I had seen on her before)

Madeline was terrified to take a bath: she refused and avoided it like the plague by running hiding, acting scared, saying no, and pretending to do something else. She ran off and fiddled nervously with something and her back turned and in the corner, stating she was busy doing something.

That seemed to be a protective mechanism she was used to having at the fathers, and hadn't yet relaxed into the safe place of mommy's. I reminded her she was safe here. She relaxed more throughout the night and I saw her remembering and feeling more safe as the night went on. She acted kind of traumatized and out of it.

At bed time, she did the same thing, ran away and hid, in a corner nervously playing with toys saying no, she was busy she can't go to bed aka: (avoiding intimate matters)

These signs form her weren't present before the visit. She normally is fine, goes to bed and takes baths eagerly. She has no other way to protect herself from individuals in charge of her care, when they act irresponsibly or hurt her, besides do what she was doing, going off and pretending to be busy to avoid the situation where she knows she is getting hurt. Since she didn't act that way before the visit, and there have been several indicators of the father and his family allowing or causing Madeline to be sexually abused, its more than likely, without a doubt that Madeline derived her fear of intimate matters from the father's visitation.

November 22, 2015

MADELINE'S RETURN FROM VISITATION; TRAUMA BEHAVIOR PRESENT

a) At 6 Pm Kevin returned Madeline from visitation to me at the Peru police station. Kevin said she was whiny, and hadn't napped. Madeline acted unready for the exchange. It is a big change situation overall, and up to the caregiver to prepare the children with confidence they need about situation (I learned this in my parenting classes to tell the children about the events ahead so they are prepared and ready) Madeline was not as happy or eager as she normally would be had she been with me. I believe she didn't have the emotional nourishment and confidence from Kevin to bravely face change, which can be hard for children. Due to her dad neglecting her emotional state, she was more afraid and weary than usual, and more fragile due to improper care, improper rest etc.

b) When I brought Madeline home, I attempted the normal routine, dinner, getting ready for bed, and dinner (since according to Kevin she was tire, crabby and hadn't napped.)

c) Right as we got home, Madeline told me how she took a shower with Daddy. Later while trying to feed her food she was spitting it up and not feeling well, which is unlike her.

d) While preparing for bath and bed, I told her we were going to give her a bath next. Madeline seemed terrified by how she acted after being informed it was bath time. She ran through the house crying no while hiding from me. When I came to her, she stated she wasn't taking a bath and instead told me she was busy doing something else (excuses why not to take a bath) This behavior from her wasn't present before visitation and with me she is usually happy go lucky and willing to take a bath. It seemed after visitation she was afraid of intimate natured activities. I decided bath could wait until tomorrow

e) I noticed a foul smelling, strange, white gunky substance unlike anything I have ever seen before on her genitals. It didn't appear to be any cream and more like an unusual suspicious substance but I was unsure what it was. I made a mental note of it and later she made statement about her dad touching her crotch which made me think it was some type of evidence. (I didn't want to be the bad guy by taking her for an exam since I was not sure what it was, and DCFS was claiming I was abusive by taking her to hospitals but unfortunately in court of law you need evidence in order to protect, so damned if I do damned if I don't.

f) At bed time, she did the same thing, crying no, and running and hiding, which is highly unlike her. It began to appear she was afraid of intimate setting like bath and bed. I reminded her she was safe here.

g) Then she slowly relaxed as if seeming to let her guards down of (protective mechanisms she developed on the visitation at her dads/ and her grandparents where Kevin left her a good majority of the time without him present. The characters at his mother's house when he is not here, are his mom, dad, and mentally ill uncle mike Mignone (severe schizophrenia) Madeline was acting this way after being in that situation so it does concern me.

h) I don't believe his parents area adequate sitters, as Kevin himself even signed a paper stating he would keep Madeline away from there due to dramatic hostility from his mother, Mary Kramer.

fearful of
bath

12

November 23, 2015 Monday

MADELINE SAYS DADDY TOUCHED HER CROTCH AND THAT'S WHY SHE IS ACTING AFRAID OF BATH TIME

In the morning time, Madeline was still expressing fears to bathe just like the previous night. She was dead set on not taking a bath so I didn't force her, and decided a maybe by night time she would be less scared. But at night, she still refused, and would run and hide and avoid all together. I was curious why she acted suddenly terrified of a usual bath. That night I was persistent that she needed a bath so I was trying to tell her that she really needed a bath and talk her in to taking one. Still, she cried no fearfully. While trying to explain to her that she really needed a bath, she was sitting down in her room and I asked her (and these were the words of our conversation exactly)

MOM: Are you scared to take a bath?

MADDY: Yes

MOM: Why, Honey, did something happen when you took a bath at Daddy's

MADDY: Yes

MOM: Did he hurt you?

MADDY: Yes

MOM: What happened?

MADDY: (while moving hand to touch her crotch) He touched my crotch

Concerned I notified Police and began to grow suspicious of that white substance she had. I contacted Edwards hospital and they said not to bathe her because it would contaminate or eliminate any possible evidence of DNA sexual abuse. They wanted me to bring her that night but was too late, I decided to sleep on it and take her in the morning if I wanted to follow through with taking her there. Later after getting her laid down and ready for bed she was pointing to her mouth and saying daddy hurt her mouth and poking her finger in and out of her mouth and then saying her mouth hurt.

I also made a call to dcfs to try to get advice on what steps I should take because I didn't want to take her to the hospital and be made to look like the bad guy. Edwards did insist I bring her though (see recording they approved of my recording the phone call)

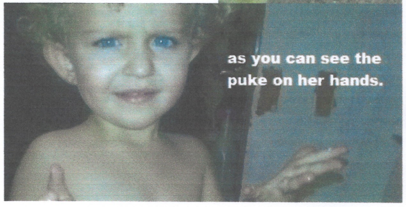
Rash, stomache ache, behavior and personality change 258

November 27, 2015 Friday

Day after Thursday's (the night prior's visitation & strong suspicious physical evidence present)

a) I had to get Madeline ready this morning, to go back with her dad for Friday visitation. Although immediately after waking, Madeline vomited all over the carpet, her hands and in the bathroom toilet. (Instead of caring for her, in order to protect her in the court of law, I have to snap pictures, which I did.)

b) She was acting sick, and withdrawn after yesterday's visitation for only being with the father about 7.5 hours. Now she is sick, this is the reason why I wanted to deny Kevin visitation in the first place. These are red flags and concerns to me as I'm sure they would be concerns for any caregiver if their child came back from somewhere like this. I am sure they wouldn't willingly let their kid go there, but unfortunately I am being forced by the law to return my child to this unhealthy environment, which seems unjust.



as you can see the puke on her hands.

c) I Informed Kevin that Madeline was sick, but he still wanted to pick her up at the police station. At the police station I informed Kevin of the bad diaper rash Madeline had got from the visitation the night before and explained to him that she never gets diaper rashes while with me. I told him I would appreciate it if he could take better care of her.

d) Kevin asked me what kind of diaper rash cream Madeline used. I told Kevin that he shouldn't neglect her to the point that she needs cream, and or develops a rash. I told him it's called diaper rash prevention by changing her frequently enough. Kevin said he understood.

e) At 6 pm we met back at the Peru police station to do an exchange. Kevin asked to speak with me outside the police station as we had met inside, and Madeline was immediately begging me to hold her when she saw me, and kept looking away from her dad.

f) I asked Kevin to tell me what he had to say inside the station. Here he gave me his 3rd explanation to how Madeline had contracted the diaper rash the night prior, which didn't match his two other stories (changing stories of abuse/ neglect signs is a warning sign of a perpetrator none the less a liar, but why is he lying, hiding things about Madeline's genital tampering signs. I wonder.)

g) This time he said she got the rash from running around in her diaper. That cannot be true, because I let her run around all the time and she never gets a diaper rash from that (show video) that means he is trying to cover up something.

h) When I got Madeline home, she had severe redness, enlarged vaginal hole, and a foul, strange smelling whitish yellow, gunky substance covering her genitals, unlike urine feces, powder or any cream. It smelled bodily like anal, sex fluid or some type of sick stuff the purposely places there

i) I tried to feed Madeline but she vomited at the sight of food and kept gagging. I was concerned by this and tried taking her to IVCH to collect specimens, but the doctor refused to examine her for sexual abuse and or collect specimens. He referred me to Edwards in Naperville. I felt like that would only put her through more trauma, and she was developing a fever and acting more sick. It was getting late and so I decided to take her home to sleep. I tried calling dcfs and edwards that night to find out what I should do Edwards said sometimes even if the child is being sexually abuse they won't have enough symptoms at physical exam. I was trying to get authorizes such as dcfs and Edwards hospital's advice, but I couldn't reach dcfs

She was crying in misery, like her head hurt, and it did feel hot. At random times she would scream bloody murder, and wince in pain so it seems like the visitation made her sick, and is therefore unhealthy for her.

November 28, 2015 Saturday

The next morning her misery grew as she puked and screamed in pain of her head hurting. She curled up in my lap in a sad fetal position and lay still and limp while crying and emotionless. She crying in pain, acting depressed, out of it, staring off, and not communicating or doing things shed normally do had she not gone on unsupervised visitation. I took her to Edwards and they just documented her fever and vomiting. She cried in misery all night long and was not her normal self at all. She was a total mess and it was very sad for me to watch her be like this when she has never been sick before unless first going with her dad. it's been a documented pattern of sickness and similar vomiting, nightmares, depression, regressive behavior, decrease in her normal activities and speech progress, she would suck her thumb, throw tantrums, cry for days, puke, lay on ground and cry and not want to participate in educational fun activities like painting, drawing reading, sitting down and doing these things. Instead shed throw the items and cry and throw herself on the ground and sob.

She wanted a popsicle, I thought would help make her feel better.

November 29, 2015 Sunday

[two days' post visitation] We had brunch at starved rock and Madeline was poorly behaved, not herself, she was throwing tantrums and crying and throwing huge fits, also she was inconsolable which not like her. I kept working with her which took a lot of me as she is usually totally fine and happy and we don't have these problems maybe I should have kept her at home, but why should she suffer health wise and us not be able to go about leading normal lives because she is coming home sick after being with her father. Pictures of later feeling a bit better and smiling and talking a little more.

November 30, 2015 Monday

Still behavior changes in her, throwing tantrums and out of it but not as bad, negative symptoms are starting to dissipate and she's smiling and talking better now, getting back to her normal self.

Sexual abuse
signs,
agression

December 04, 2015 Friday

KEVIN PICKED HAD VISITATION FROM 10 AM TO 9:30 PM. HE HAD TO WORK, AND LEFT MADELINE AT HIS PARENTS, EVEN THOUGH I OFFERED TO BABYSIT, AND I HAVE THE RIGHT OF FIRST REFUSAL. KEVIN ALSO VERBALLY AGREED HE UNDERSTOOD I WAS OFFERING TO WATCH HER WHEN HE WORKED BUT DENIED ME ROFR ANYWAYS.

I drew up a document for us both to sign on days he had to work on his visitation and I would be available to baby sit. He verbally agreed see recording, but refused to sign the papers. When he had to work later, he refused to let me watch her and instead left her at his parents.

When Madeline returned this evening: Madeline began aggressively abusing our pet cat as soon as she walked in the door. Kevin dropped her off and he was avoiding him when he was trying to say goodbye or give her a kiss, she was leaning away from him and saying no, like she didn't want him to be close to her. I looked at them, and Kevin stated that's how she was sometimes. She continued punching and kicking the cat literally beating it up which is not a common behavior for her. She was also stomping on it tail. I heard animal aggression is a sign of abuse in children. She was also super hungry and eating nonstop. I don't think her dad is feeding her right. But later when I changed her diaper I noticed swelling and widening of the vaginal opening. to me, knowing what she looks like on a regular basis it looked as if something had been inside her there was a noticeable difference in her vaginal area. But it was extremely late and I didn't want to take her to the hospital because as the doctors say sometimes there aren't enough symptoms to prove sexual abuse and I would have to wait for a later apt when doc was in office anyways, plus if the abuse is occurring there will be more times to take her to doctors.

December 05, 2015 Saturday

KEVIN PICKED HER UP APPROX. 10 AM FOR VISITATION. KEVIN SET ME A PIC OF A BLANKET FOLDED UP ON THE FLOOR NEXT TO HIS BED IN HIS STUDIO APARTMENT AND SAID THAT WAS MADELINE'S BEDROOM.

(It used to bother me but no one else seems to care as much as I do) He told me he was going to be with her all evening besides when he had to do a show around 5 pm. He denied me rights to baby sit then too, when I was available and I had offered. He said his parents had taken her and she fell asleep in the car and slept the whole time while at their house. Kevin then took her to his house, they stayed the night there. as far as I know.

December 11, 2015 Friday.

DCFS CASE WORKER LISA TRAVIER HANDED THE INVESTIGATION OVER TO AN INCOMPETENT INTACT CASE WORKER THORUGH YSB, JUDY ALLEN

Lisa, the DCFS case worker, never viewed any of my video evidence of Madeline abuse and trauma signs after visitation with her father even though I told Lisa I had video and picture evidence. After I talked with Judy a bit more, I found out she was not qualified to look at the abuse symptoms, or evidence and her job was to refer me to someone that could. Basically a huge waste of time, and she couldn't even help. Plus, DCFS didn't investigate thoroughly. I went ahead and made an apt. with YSB

December 12, 2015 Monday

APPOINTMENT WITH JUDY THE INTACT CASE WORKER

Judy Allen came to my house at 9:00 am. She was very unprofessional, wearing trashy clothes, didn't wear her glasses, and brought no paper work.

I attempted to show her the evidence and notes I had written regarding Madeline, but she informed me should couldn't see since she didn't have her glasses. (This is a joke of professional quality service, at the expense of a potentially abused 3 yr. old child.)

Judy was shaky, and rambling. She appeared under nourished and under fed. None the less completely unprofessional. I did not feel safe by her domineer, and she seemed very under educated. She was also making me feel threatened. She continued to talk over me, interrupt me and act a bit hostile. She continued to wave her hand, and get in my face, telling me to let my assumptions and stuff go, and that it could not be going on. She was making statements like "Ya' know what I mean." While bobbling her head. I felt completely let down by the service I was getting. I felt very frustrated why she would be dismissing everything and trying to tell me to let it go, while saying it might not be happening, while I had evidence in front of her that she refused to look at because she didn't have her glasses. This was completely ridiculous. She kept talking a mile a minute, and was not listening to anything that I had to say. She continued to tell me to relax, and that she assumes Kevin would not be doing this to his child based on the fact that she, as a person would not do that to her child. I then began to question her credentials.

……………..

December 14, 2015 Wednesday

INTACT CASE WORKER JUDY ALLEN'S FIRST VISIT WITH MADELINE, TICKLED HER RIGHT BELOW THE BELLY BUTTON, AND **REFUSES TO INVESTGATE KEVIN**

Judy Allen came to my house for her first visit with Madeline.

She acted so ghetto and unprofessional that she didn't even seem capable of having a mature adult conversation. She made me feel very ill at ease in my own home, which shocked me since one would assume she would be more professional since she works for a government agency. She was rambling, and over talking me with an even louder voice, when I tried to speak. She was waving her hands in my face and telling me abuse might not be going on, based on the fact that she wouldn't molest her own kids, so Kevin probably isn't either… I really began to question her credentials. She also kept telling me to relax, when I was relaxed. She seemed very over the top, invasive, and uneducated. She kept interrupting me, and didn't seem willing to listen to what I had to say. I didn't feel she could help or even seriously wanted to, or acknowledged the seriousness of the matter.

When she first saw Madeline, meeting her for the first time, Judy reached out and tickled Madeline below the bellow button. This made me uncomfortable due to the mater of the need for services being sexual abuse and I cannot think a reasonable professional would think that doing that to a kid they first meet was appropriate. I told her not to tickle her and explained my reasoning. I don't want Madeline getting comfortable with complete strangers being allowed to touch or tickle her, as a self-protective, boundary mechanism since not all strangers are safe. Although Judy was the case worker, to Madeline, she was a brand new, complete stranger she didn't even know and Madeline shouldn't be taught to allow strangers hands on her since she is too young to differentiate good from bad touch. Judy said she understood. At that point I was completely hesitant about the whole thing and couldn't wait for her to leave. I intended to call and complain to her supervisor.

Judy continued to explain that she needed to do a walkthrough of my house, and asked me if my house was a 2 bedroom. I told her I was uncomfortable with that, and that I felt I have been investigated enough. I explained that Kevin should be investigated, since all along he been the alleged perpetrator, and Madeline shows signs after being with him, in his studio apartment, and he has not yet been investigated. I explained, if they could just go to his studio apartment, that they would see concern, since it is so small, no room for Maddy, and they would probably find drugs. Kevin doesn't seem stable just by the way he keeps his place so messy that there is no place to walk or set anything's. Kevin owns a book on how to beat paranoia also. I explained I felt a mental evaluation would seem fit since he has mental illness, namely schizophrenia that runs in his family. Judy told me she could investigate him but that there was no need to at this time since Madeline lived with me.

After the tickling incident, I had I requested a new case worker, when the YSB director informed me that Judy was the only intact case worker for this county. I had made an apt with a counselor at YSB, which Judy stated that was all she was there to help with (and investigate me) so that since I had already made an apt, she could resign from the case. But after she did, and I called complaining of her unprofessionalism, YSB would not follow through with me despite several calls, personal visits to the office and voicemails from me personally trying to get an apt set up. It seemed nearly impossible. YSB was now not helping either.

The child came up to the father and started rubbing his penis. The father simply looked at the mom, and allowed the child to continue rubbing his penis. He didn't tell her no, or to stop. The mother was concerned and asked the father is this is what goes on when they are alone, since that is not normal for Madeline to do. The child cried to the mom and said, yes mama, I want to go with you, hung her head, and hid behind her mom. The mom asked why the father didn't make the child stop that behavior and the dad stated she is just a kid. The mom reminded the dad of his responsibility to teach the child right from wrong so she doesn't go up to strange adults and rub their genitals, which she had a habit of doing for probably the reason the father lets her do that. The mom made reference to teaching a dog not to pee on shoes, by telling it no, to train it to not do wrong and told him it's much more important to train a child than a dog. At that point the mom thought about quitting school since she didn't feel the father was reasonable enough to babysit the child in the ROFR act. The mother asked the father to please train the child properly and teach her right from wrong by telling her to not touch his crotch If she touched his crotch again. The mom once again tried to give the father another change, because legally, what choice does she have in that she already told the judge of the sexual inappropriateness of the father with the child. The father seemed clueless and withdrawn still. The mom fixed the child's bed and showed the father how to get her to sleep in her own bed. When the child lay in the bed at the father, she screamed bloody murder, NO NO NO, until she fell asleep. She never usually does that and I think it was an indicator of a bad memory in that bed.

nightmares

acting out sexually

1/14/2016

The child's mental, emotional, physical, and moral heath endangered. Father lets minor child grope his genitals, and doesn't make her stop. Father makes excuses why it's okay for the child to be able to stroke his private parts.

Mother had school the next day and offered the father to watch the child overnight, since they were in agreeance the father would babysit the child during the mother's school day until the father went to work. The mom offered overnight, so the father wouldn't have to get up very early in the morning since the mom left early in the morning for school.

Around 11 pm, the mother checked up on the minor child who was at the father house. Since the father stated that the child was sleeping in bed next to him and making excuses to the mom, why the child couldn't sleep in her own bed at his house. When the mother showed up at the fathers, the father seemed on drugs, sitting in bed next to the child.

The child was in a soggy wet diaper, begging for food and water. The father stated his apartment was too small he had nowhere else to sit, although **the child had a mat on the floor in the corner, surrounded by a sheet hanging by tacks from the ceiling and a cardboard box which the father considered to be the child's room**. There was no walking room around the mat, the box was immediately lining the mat. The father stated the reason why the child couldn't sleep there was that the sheet was blocking the view of the movie. The mom asked dad to move the sheet and let the child sleep in her own bed. The father refused. The mom told him she wanted the child in her own bed and told him it was easy to move the sheet since it was not hard work but the father refused. The mother stated if the child was to stay there she was sleeping in her own bed, and she moved the sheet herself so the child can have her own space.

The child was in a wet diaper, full and soggy and also begging for food and water. The mom asked the father why he wasn't caring for the child, and he stated it was getting late. The mom reminded the father not to neglect the child, and asked him to get her a bottle while she changed the child's diaper, since the father was blatantly incapable of doing for his own reasons. The father refused again to get the child milk, and the child continued to ask for something to drink and eat. The mom explained to the father the importance of nourishing the growing child with food and drink, but the father refused to get the child something to eat and drink. The mom cut up watermelon, fed the child and made a bottle that she placed in the fridge and showed the child where it was, to help herself whenever she thirsty since the father was refusing to care for her properly. The father was angry although the mom was just trying to care for the child and offer help to both the father and child.

The fathers place, a studio apartment was crammed, full of piles of stuff, and very messy, unable to walk through, (no foot room) The mom offered to clean the place. The father tripped over piles of his belongings in the kitchen and almost fell to the ground. The mom did tidy up and explained her desire to help make a better environment for Madeline and that she didn't mind helping. The father has always had a problem organizing and his house was always messy. Since he has a small studio apartment, that is not okay to have it crammed and not enough space while the child is there. The mom had offered several other times previously to help clean the fathers place so it was safer for when the child was there but the father never let her help. The father had piles stuff and stacks of music gear, such as sitar, guitar, speakers, etc.. The father's residence acts as a better storage room, than home for a child.

The father sat in a corner and cried, stating the mother was never going to see him again. He acted unstable.

abuse

January 15, 2016 Friday

1. Friday evening, Kevin brought Madeline back to my house since he couldn't fulfill all of that visitation day.
2. While Kevin was standing in my living room, he began to hold Madeline, and turn to the side. I saw his hand moving, so leaned where I could view what was happening. Then, I saw Kevin, moving his hand back and forth, making his stiff fingers, poke Madeline's genitals, in a stimulating fashion. He was repeating the motion quickly as if what seemed to be trying to do it as much as possible, one more time, before he left Madeline for the rest of that day.
3. I told Kevin, that I saw him doing that to her. I also said how Maddy had been coming home after being with him fingertip shaped red dots, and bruise marks on and around her groin area, that I believed was caused by him poking/ rubbing her there with his fingers, and through her clothes at least in my presence)
4. I told him that he should stop it or else I would be able to gain evidence since he was leaving marks on her.
5. Kevin didn't respond to me, and simply walked out the door.
6. I didn't believe there was enough physical evidence for a doctor's exam, since it was through the clothes and leaving bruises around the vagina, not in or on the vagina, and doctors most often times need hefty forensic evidence such as severe bleeding or bruising from rape like incidents, not minor poking. But it is still considered sexual abuse)
7. Later this evening at home, while watching a movie, Madeline was taking my hands and trying to make it touch her crotch, and looking to me as if she was seeking approval.

January 16, 2016 Saturday

Kevin not following the JPA

Kevin suggesting, I may not let him take Madeline for her birthday after I witnessed him sexually molesting our daughter's crotch, and it was leaving bruises and blisters around her genital area.

1. Kevin was supposed to have visitation this Saturday, but did not fulfill it.
2. Saturday night, Kevin called to see if I was going to let Madeline go with him after I witnessed him sexually touching her genitals. Kevin stated, "Are we still cool, because I wasn't sure if you were still going to let Madeline come with me, after what happened yesterday." (Friday, January 15th)

   I saw him molest Madeline through her clothes, in my living room.

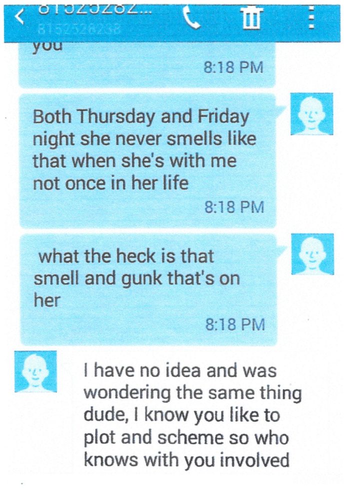
CHILD HAS FOUL SMELLING GENITALS WITH UNUSUAL SUBSTANE AS WELL AS SEXUAL BEHAVIORS AFTER 4 HOUR VISITATION

1. Kev had Madeline from 10 – 2:45.
2. Saw Kevin touching Madeline when putting her in the car, she was saying stop it stop it.
3. She had an unusual white and foul smelling odor on her upon return from father, it smelled like genital fluids.
4. Her behavior was sexual after the visit too. She was
    a. Pushing toy giraffes to press on her crotch
    b. Humping the dog
    c. She wouldn't stop the sexual acts despite being told not to.
    d. Mother had to sit her on her lap and make hold her hands, to stop the child from touching herself in the genitals since she wouldn't stop after being told verbally. The sexual behavior from the child was excessive and consumed her focus, diverting it from otherwise normal, innocent activities and focuses of the child.



you

8:18 PM

Both Thursday and Friday night she never smells like that when she's with me not once in her life

8:18 PM

what the heck is that smell and gunk that's on her

8:18 PM

I have no idea and was wondering the same thing dude, I know you like to plot and scheme so who knows with you involved

March 17, 2016 Thursday

KEVIN NOT LETTING MADELINE USE THE RESTROOM FREQUENTLY ENOUGH, NEGLECTING TO CARE

Kevin had Madeline for 7.5 hours today, fulfilling visitation from 8 am – 3:30 pm. Kevin had work around 4 pm and going later into the evening. He is also self-employed and created his own schedule on visitation days, etc.

At 3:30 pm, I met Kevin at music suite 408 to get Madeline. She was with him only 7.5 hours this day, Kevin told me she only went to the bathroom once, all day (almost 8 hours)

That is too long to hold urine for most adults, none the less a 3-year-old potty training girl. I have told Kevin many times, she needs to go more than that and what times in particular to offer her a chance to use the restroom as she is not yet independent and relies on caregivers to help and encourage her to use the restroom.

I told Kevin, that It's common for Madeline to use the restroom 1 -2 times, every 1 – 2 hours when she is with me.
The average expected for a toddler to use the restroom, 1-2 times, every hour or so, (not 1 time in 7.5 hrs.)

I reminded Kevin again after he told me of this, and also told him that if she holds it that long she can get an infection. I told him its abnormal for her to hold it that long and that she goes with me about once or twice every hour or two. I offer her far more frequent chances to go than once in 8 hours and any reasonable, suitable caregiver would offer more than once in 8 hours also.

Kevin listed excuses why Madeline didn't use the restroom all but once. He said, she didn't have to go, and that she refused to go.

When I explained to him how she needs us to make her try at this point in potty training, and be consistent with times to have her try such as after naps, before car rides, ever hour or so**, Kevin expressed that he "Ran *out of time*" that day to care, for our daughter** and allow her times to try to go.

It is not that hard, and if he was unable due to being so busy, to care for her, then he shouldn't take her due to it endangering her health and wellbeing since he is running out of time to care for her in 7.5 hours of visitation time. God forbid she was with that man any longer.

1. *Madeline might be trying to protect herself from going to the bathroom and risking being touched by her dad when with him.*
2. *Or Kevin is ignorant and neglectful.*

Neither is conducive to Madeline physical health, wellness and best interests. Holding the bladder too long can cause infection and need treatment for. With proper care, this risk could be avoided.

I know how Kevin is, and he usually rushes around careless to other needs and will not allow Madeline opportunities to use the restroom even after hours have passed and before going somewhere. He just makes her hold it. For example, Kevin Maddy and I hiked at starved rock for 3 hours. Madeline drank lots of water too. It was time to leave, and I wanted to let Maddie use the restroom first. Kevin got angry since he just wanted us to leave. Kevin completely ignored Madeline need to use the restroom and If I was not there he probably wouldn't have given her a chance to. He seemed to think she doesn't deserve to go to the restroom like a human being.

03/26/2016

Madeline acts out sexually and is vomiting due to going on visitation

Madeline was at her dads the night before.

This morning Madeline was immediately sick and puking when she woke up. She begged to stay home with me instead of go back to her dad's for visitation. Kevin was scheduled to have her this visitation, Thursday, Friday, Saturday and Sunday. (Four days in a row)

- *a.* **Supportive information;** *Madeline only comes back sick after being with her dad. She hasn't even gotten sick one time from being with me. When she didn't see her dad, she never got sick, only when she sees him, does Madeline continually come home ill. The visitation with her father is causing this and is therefore a risk to Madeline's physical health. It is not normal for children to constantly get sick after being with someone, parent or not. Children should be protected from such situation whenever possible. Madeline's rights should be more important than her father's here, since she is the one suffering. I have read many times, that sickness like Madeline displays after visitation with her dad Is are signs of sexual abuse. There are many other signs of sexual abuse that Madeline also displays from after being with her dad.*
- *b.*

2.) Also today Madeline attempted to rub my dad's crotch several times. This Is not normal behavior of a three-year-old. I have told her not to do this. Sadly: I have witnessed Kevin allow Madeline to touch his crotch without stopping, and Madeline doing so upon first seeing her father. Therefore, her father is teaching her this behavior is acceptable when in deed it's embarrassing and harmful to her safety if she thinks it's okay to go up and do that to men, because she foes that to daddy. That can put her in harmful situations

3.) Later Kevin stopped by to see Madeline, and even though she was sick, forced her to go to his family's Easter. He also kept her from me both days. Today, when she could have stayed home and rest, and tomorrow, the whole day for Easter, when I had family waiting to see Madeline, Kevin didn't let her come to see me or my family at all for Easter,

Acting out sexually.
16

03/27/2016

Kevin withheld Madeline from time spent with my family on eater. Madeline shows disparaging and adult like sexual behavior alongside admittances of sexual abuse done to her by Kevin after returning home from visitation.

Kevin had visitation this day, as well as Saturday Friday and Thursday.

Today was Easter, and my family wanted to see Madeline, but Kevin had her. Kevin also had Madeline the night prior He had family Easter, the night prior, and this day. He withheld Madeline from experience family Easter with my daily, and kept her for two with his, while she was sick for one of them. He then returned Madeline late this evening around 6 pm. Long beyond any time could be spent with my family.

After Madeline returned from her father's care, Madeline displayed sexual abuse signs. Soon after her return, she played with the toy doctor kit I got her one of her Easter presents. Madeline stuck the thermometer in my mouth and said How's my cock." Then later this, she shoved toys down her throat making herself gag almost like deepthroaitng, several times and almost puking after. Then later on, Madeline was touching, and arousing her genitals very adult like for a three-year-old little girl. She normally doesn't do that, but only sometimes after going with her father. I asked Madeline why she was doing that, and she said her daddy touched her crotch and frozen underwear, a time other than when going to the bathroom (she knows the difference between the two and would refer to bathroom touch as wiping pee or poop) I tried to get a video of this and did the best I could but I am no professional is asking the right questions, and I may have asked too many, but can you blame me? I think any parent would be a little suspicious of their three-year-old coming back saying and doing these inertly sexual things.

-Also seen here is a picture of the toys Madeline got from her father from Easter, he sent me a picture of three, sent her back with two, so he kept one. He commonly gets her stick toys I believe he pokes her with purpose to train her for sexual behavior. he got her a hat, which she squeezed this tube to make the ears bounce, training her hands for position for sexual behavior (touching him)

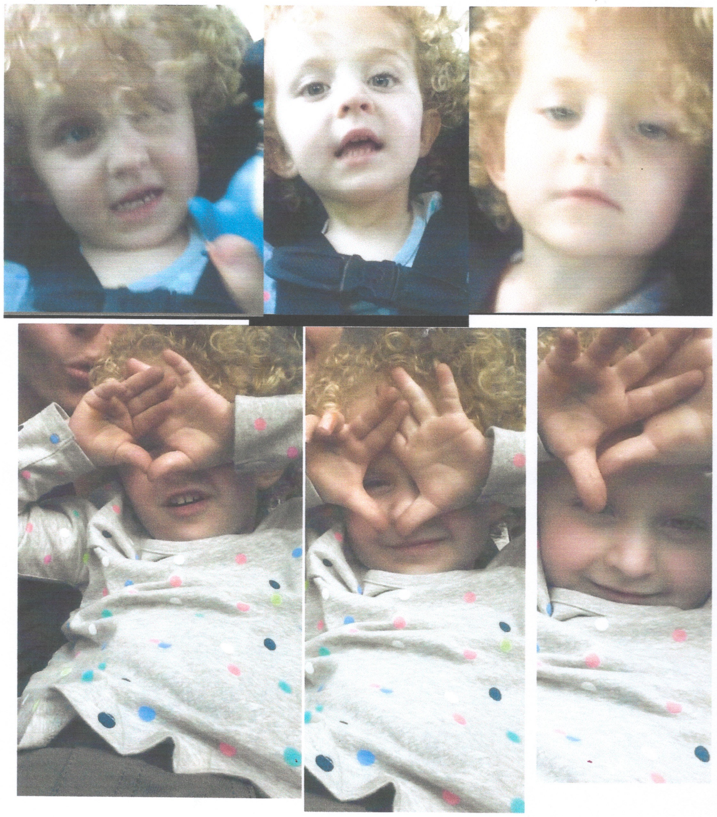
I wasn't prepared for her to say this and I couldn't get a second confession from her when I got my recorder out.

04/14/2016

Kevin made physical contact to me, which was in a threatening and intimidating nature, and Madeline acts scared and traumatized from the presence of her father.

Me and Madeline had plans to go to Boggio's farm in Granville, IL for my birthday and Kevin was going to meet us. Later that day we found out Boggio's was closed, but we still wanted to meet up so Madeline could enjoy the outdoors, and since Kevin was already planning to go out of his way to meet us. We decided to meet at starved rock near the bottom entrance, and Madeline fell asleep on the way there.

I waited in my car for a bit, while talking to Kevin and waiting for Madeline to awaken. When Kevin stood outside Madeline's car door/ window, she began to cry and talk in her sleep saying "No! Stop it! Don't touch me!" She then opened her eyes and began to act extremely frightened when she saw her dad standing there. She started screaming bloody murder, and reaching for me, begging me to hold her right away. This concerned me and I mentioned to Kevin I was just going to go home since this was abnormal for Madeline to act this distraught. She continued crying without ceasing and proceeding to have breathing problems due to crying and hyperventilating so much. I mentioned leaving again. Madeline never acts this upset when she is with me, so this was highly unusual for me to see her like this. It appeared she was acting clearly scared of her father. I recorded this. Kevin insisted we stay, and get out and play in hopes Madeline would stop crying. We got out, and played for a bit. When it got dark out, we all headed back to our parked cars to leave. First we got Madeline in her car door, and Kevin was standing outside the door. Right after I got her in her car seat, Kevin proceeded to push me right in front of her. His reasoning was that it was time to leave. I told him I didn't need to be pushed, and I could leave on my own. I mentioned how he was standing outside her door still, talking to her, so I was watching, and having a moment with Madeline outside her window too and would leave when he did. Later Kevin kind of admitting to the said shove, calling it a gentle nudge, but not denying it later over phone text messages.



As you can see the [Above] pictures, the child is making hand symbols known to belong to the Illuminati, and the Satanic culture. The father has made statements and shows some proof of being involved in these said cultures. Whether or not why the child makes these hand signs after being with the dad, and no other times is of any significance, can be cause for speculation

You can observe the child's apparent weakness as she lay her whole body weight against the mom.

4) **Supporting information:**

During time Madeline had no visitation and some supervised visitation with her dad, the sexual behaviors, and physical tampering symptoms to her genitals went away completely. As soon as judge Jansz re ordered the visitation to ensue, Madeline immediately had physical symptoms, she made statements that the father touched her crotch, she became fearful, acted out sexually, touching herself and humping, she became sick, vomiting with fever, and more. None of these existed without the visitation and some of these symptoms were only after being with the father for a 3 – 8 hour span which is far too brief for such intense symptoms to develop was she being cared for or in a sane, stable, and healthy situation while on the visitation.

April 29, 2016 Friday

KEVIN HAD VISITATION UNTIL 6. AROUND SIX HE DROPPED MADELINE OFF TO ME AT MY HOUSE. AFTER RETURNING, MADELINE SHOWED SEXUALLY CONCERNING AND PREOCCUPIED BEHAVIORS THAT AREN'T NORMAL FOR HER USUALLY, AND SEEMED EXCESSIVE.

1) Madeline acted scared of the bed. She also was uncomfortable being held or touched/ comforted
2) She was humping excessively throughout the night and she was continually humping in the middle of normal activities where she otherwise normally wouldn't hump.
3) she was humping the bed and moaning loudly then trying to lie and hide the behavior.

1) **Event #1**-First, after Madeline got to my place, and her dad left, I brought her to her room to see the books, decorations and treats I had lined up on her bed for her as a surprise when she got home. I expected her to be excited, but oddly, when she saw the bed, she retracted away in fear in what seemed because of the sight of the bed (uncomfortable about bed due to being at dads previously) I tried to console her and tried to set her on my lap and cradle my arms around her to make her feel safe, but she pushed my arms away. It seemed she didn't want to be touched. She was uncomfortable with touch or me getting my hands close to her when I went to cradle her, which is unlike her (I think this has something due to being at dads prior) See Note:

NOTE: When I went to cradle Madeline, my hands were near her chest area like a hug, but not touching. She immediately pushed my hands away. A few incidents in the past that support the theory that her discomfort of being touched are related to being with her dad are these. On a few occasions I witnessed Kevin rubbing, and stimulating, like tickling Madeline nipples. I mentioned this was inappropriate, but Madeline went with him for visitation anyways. After that, when Madeline was getting ready to go back on visitation with him, in the morning, she began to talk to herself and shouting NO, Don't touch my boobies, they are my boobies, not yours! I feel that she was saying this due to her father, touching her breasts, and preparing herself for what she might say to him. I was not involved in this conversation it happened out of nowhere, all on her own. Madeline never even knew the word boobies until after a visit with her dad. She had periodically come back rubbing on hers and trying to rub on others breast and also with knowledge of the words boobs, and touching and talking about her boobs, after being with her dad. I never taught her this. And she never said that until after being with him.

2) **Event #2**- Back to this night's happenings, After the discomfort with being touched, Madeline proceeded into the night, humping multiple chairs and attempting to hump my leg, I counted about 8 time in 45 minutes she attempted to hump things. We were playing with pets, and toys, and I was trying to keep her occupied. She doesn't normally have a problem with staying focused, or humping things so much When I denied Kevin visitation, these behaviors stopped all together. I think the humping is excessive especially for a three-year-old and considering its becoming a distraction and has been occurring since she was 6 months old after being with the father, and 6 months old is too early for age appropriate humping, therefore I don't think what is happening now is age appropriate and is more of a continuous behaviors present after visitation with her father.

3) **Event #3**: After the humping and closer to bed time Madeline and I were in her room drawing pictures. Madeline asked me to get her a slice of pizza from the kitchen which was cooked and setting out on the counter for us to eat that night. Immediately as I went to grab the pizza, I heard Madeline moaning loudly from her room, so I turned right back around to see what she could possibly be doing since I expected her to continue coloring the picture she was busy working on. When I walked back, it was clear Madeline thought I wasn't going to see, but she was furiously humping the bed, loudly, and wildly moving about while doing so. When Madeline snapped out of it and saw me there, she jumped up on the bed, laid out and put her hands behind her head. She acted like she wasn't doing anything at all. And then she said, *"Oh I was just getting a drink of water."* In a low voice, unlike hers. So apparently now my child is trying to act this way when she thinks I'm not looking and then lying that she was doing something else even though I saw what she was doing. This is pretty concerning to me, and I don't feel like I should have to deal with my three-year-old acting out sexually unlike her normal self, and then lying about it. I am not the type of parent who wants my daughter to feel okay with lying. I am an honest person and teach her to be honest, and be an honest person and also to be honest with me at all times. I am trying to raise her right and teach her to be an all around good, and moral human being with integrity, dignity, and respect, not deviant sexual behaviors and being a liar. I feel like she is way too young to be acting like this. I don't feel that any parent should have these types of things come up with their three-year-old boy or girl. Any logical parent would constitute the visit and overnight at the other house as a cause to this new behavior which isn't present unless the child goes with them, as its been noted when I denied Kevin visitation. How is any good, sane a reasonable parent to see this and brush it off like it is normal? If any person was to disregard that and not consider it a red flag, I would say they are negligent.

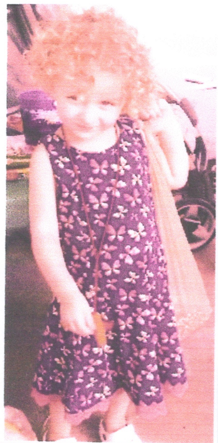
May 23, 2016

MADELINE RETURNED FROM 4 DAY VISIT WITH FATHER, WITH A COLD CORE ON HER LIP, A WHISTLE NECKLACE THAT WAS HANGING SO IT BOUNCED ON AND HIT HER CROTCH, AND SHE WAS EXCESSIVELY MASTURBATING.

Madeline was on visitation lasting four days this weekend. She was supposed to be in his respective care, although he was working a majority of the time, and didn't allow me the right of first refusal.

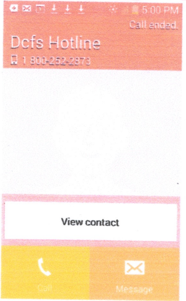
Kevin and I exchanged Madeline at the police station. When I got Madeline home, I noticed she was wearing a whistle necklace.



The whistle was hanging, and smacking her crotch as she walked. I asked her who got it for her, and she said daddy. She said daddy makes it touch her candle. I asked what a candle was, and while inside the house, she lifts up her dress and began touching the whistle to her genitals and said "See, candle." She continued to continuously rub the whistle to her genitals and said "See, candle." She continued to continuously rub the new toys I got her, on her crotch and proceeded to obsessively grab at. rub, and wiggle her fingers on her genitals throughout the evening. I could not make her stop. She would not. Later we went to get ice cream, and she was rubbing her crotch in front of the people at twisty free on 351 in LaSalle. After that we went to Walmart, and she did the same things in the cart. She was acting extremely sexual and humping as well.

I called DCFS after I saw all of this and the lady responded that I could be charged with falsifying reports, and read me the law about being persecuted about that.

Madeline is too young to decide whether or not she wants something constantly rubbing her crotch, and this behavior even with the whistle is invasive by the father, and an intrusion of her personal rights. Any reasonable person would see that its hitting her crotch as she walked. It seems the intention of the father is to create stimulation in this area. It is necessary to keep the minor child away from such an individual who chooses to invade and disrupt her personal rights, instead of respect them. She needs her rights and body to be respected and she is not yet old enough to protect or care for herself so she needs to be with adequate care givers, and clearly the father is not one. He is causing stimulation to her genitals and thinks its funny, and this poor child is a victim.



5:00 PM

Call ended.

06/29/2016 (Wednesday)

After a visit with the father, the child was rubbing her toys on her crotch, and rubbing her crotch when the child and mother got home. Even a minute visit proves to cause the child to act in a sexual way. There are probably many reasons for this.

Julia ran into the father at Hy-Vee grocery store. She let the father take the child around the store while he went shopping to be counted as **make up visitation**. When the father handed the child back to the mother, his hands were placed underneath the child. The mom also placed her hands underneath the child to hold her, and the mother personally felt the father's hands, and fingers, jamming them into the child's genitals. The mom explained that and upward movement of his fingers into the child's genitals were not necessary, and felt him doing it red handed. When a person doesn't want to stimulate a child, they withdraw their hands and digits away from creating deliberate sensation to the child's genitals. In this case the father was making a deliberate attempt to cause sensation when he is smart enough to do, otherwise. His intentions are ill, with the child.

After that, the child was rubbing her toys on her crotch, and rubbing her crotch when we got home. Even a minute visit proves to cause the child to act in a sexual way. There are probably many reasons for this.

Redness,
Rashes

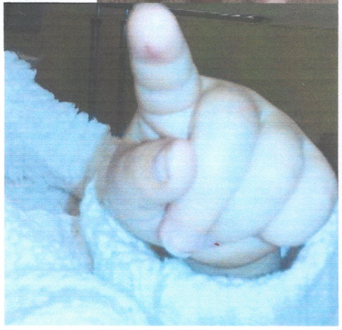
November 26, Thursday

[visitation day]
Thanks giving Visitation.
They picked her up at my house at 10:30 am
Kevin was with Maddy all day and available to care for her. But he didn't - as visible by her noticeable diaper rash and unusual gunky substance on her genitals when I got her back from him that evening.
Before she went she was clean and healthy and happy.
[Before visitation]

He brought her back to me at my house around 8:30 pm. She was only with him for a ten-hour period. Upon changing her diaper after she was returned to me that evening, I saw her genitals were very red, swollen, rubbed raw. Unknown what it was exactly because in my experience it's difficult for her to get that bad of a diaper rash unless she was neglected and no one was changing her diaper all day. Or perhaps it was caused by other means. I was not there. I do not know. There was also an unusual gunk with a fishy scent present on her unlike anything I've ever noticed from creams, wipes or the smell of urine. It smelled very strange. I took her to Edwards hospital in Naperville to have her examined and symptoms documented, they wanted to run a rape kit on her. I want to help Madeline but also don't want to hurt her. This is something that's continuously going on where she comes back from her dad like this, which concerns me and part of the reason I denied him visitation in the past, wherein which these symptoms subsided. At the hospital Maddy slept. 3.5 hours passed by the time she was finally examined, although the nurses really felt the need to run a rape kit to test the gunk on her for dna/ run special tests to evaluate more forensic evidence of sexual abuse. Her symptoms had severely dissipated as she had peed and it has cleaned up a lot of that gunk. They recommend next time she shows these symptoms upon arrival to allow them to run rape kit to test for specimens and better help get to the bottom of things.



Another one of her symptoms after returning, she had a strange perfect cut/ incision on her pointer finger.

At some point in time I asked Kevin about the diaper rash He said three different stories regarding it.

1- He said she came to him like that, which is a total lie.

2- He changed his story to, "she's a baby, babies get diaper rashes."

3-The next day he changed his story to "She got the diaper rash from running around in her diaper and it rubbing on her." Which is not true.

(see my evidence of videos of her running in her diaper, never had she got these symptoms from that.) so he can't try to tell me that.

Child acts in a sexually inappropriate and adult like manner after being with father

Kevin had visitation this day. He only filled a portion of it and brought Madeline home to me this evening.

When Madeline returned home she was acting overly sexual: After arriving home from dad, Madeline appeared to gather sexual behavior from the father. She was continuously trying to poke, and tickle my crotch as if this was done to her on the visit, or she was made to do that to someone (*I have witnessed her dad allow Maddy to do this to him and also seen Madeline began touching her dads crotch immediately upon seeing him as if something sexual was always happening between the two and she was trained.)*

The child was looking to mom for approval while trying to touch her crotch as she may have during the visit with dad. While trying to touch my crotch, Madeline was also looking to me for approval as if getting approval for doing that with dad (*who commonly lets her do that*) and she acquired the learned behavior seeking praise while with her dad.

Madeline doesn't act in these sexual ways when she doesn't have to go on visitation with her dad

Madeline proceeding the behavior despite being told no.
I kept telling Madeline no, but she persisted to try to invade my genital area.
The child tried to sneak the crotch touching behavior by:
Soon after being told no, and to stop the crotch touching, she began pretending to walk by me and then quickly she would jab her hand at my crotch, hitting it so fast- in a bullyish manner so as to accomplish the touch without me being able to stop her. This act isn't normal for children for Madeline's age to do on their own, and is mostly likely derived from what she is taught or done to her on the visit. The behavior also isn't common from Madeline and only happens after she's with her dad, but will completely subside if the visitations do.

Quickly accomplishing touching a crotch: is not something a kid would know how to do, unless taught, or done or shown to them by a supervising adult.

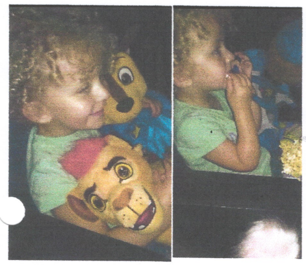
The child has developed an apparent stutter, which was caused by the visitation. The child is unable to speak properly or in complete sentences as she was, before the visitation. The child still shows an obvious development backslide.

Julia took the child to gymnastics, 9:00 am at the YMCA.

This day, the child wasn't her usual self. She was catatonic, staring, and not talking or being engaged as her usual self. While attempting to talk, **Madeline was displaying a stuttering pattern** which is unlike her usual fluent speaking abilities for her age. The stutter seems to be caused by the visit Later this day, they met Beverly Schneider for lunch. Beverly witnessed Madeline in the unusual withdrawn state, was talking with a heavy stutter, and not acting her usual self. The child admitted to Julia and Beverly that her father hurt her mouth, and that her mouth hurts while pointing at her mouth. The child didn't specify how he hurt her mouth. Julia went to the store, and got Madeline some presents to brighten her up. At the store, **Madeline went up to two men, and tried touching their genital areas**. One man was sitting down, and Madeline walked up to him and hung over his leg, rubbing against him and stuck her hand into his genital area. Julia had to correct the child's behavior, which seems to be caused by visit with the father. The child when with the mom, solely, never acts that way. Sexually abused kids will not know boundaries, when children who are not abused will not do that type of thing. The other man she did that to was in the checkout line behind Julia and Madeline.

Madeline told Julia that she was at her uncle Steve's house, when with daddy and she goes there to play. She mentioned going there when she was last with her father. Steve appears a bit creepy and Julia doesn't know him personally. His license plates say Texas and he lives right next to Kevin. Kevin does spend time with his uncle while he has Madeline. It's unknown if he leaves the child alone with Steve.



Later this day, the child sated she was having nightmares, when she woke up from her nap. The child had spurts of crying on and off, and appeared emotionally wounded and unusually fearful. I had to put a lot more effort into healing and babying her, as she was not her usual happy self. The visitation seemed to have caused this. The child never acts this way, ever, when she was solely with the mom and didn't go for a visit with the father.

Julia took Madeline to the movies and they watched DORI that evening.

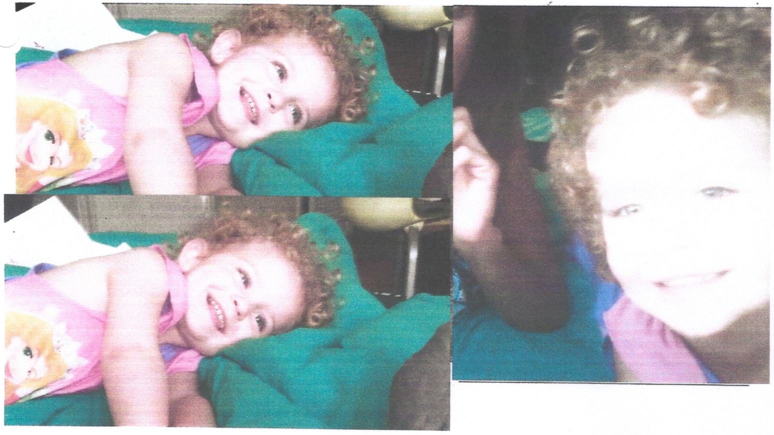
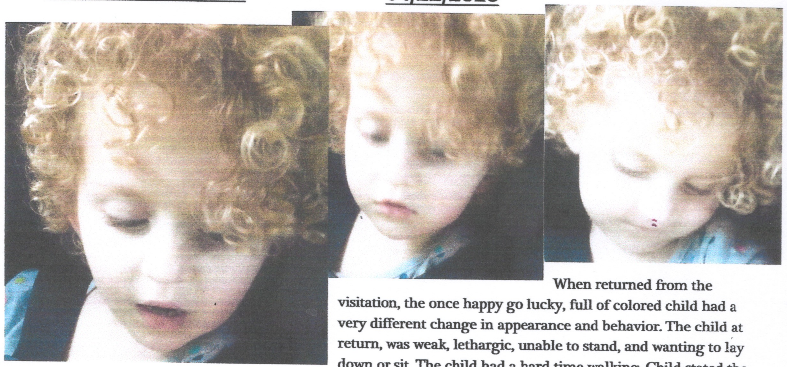
BEFORE VISITATION



AFTER VISITATION

04/22/2016



When returned from the visitation, the once happy go lucky, full of colored child had a very different change in appearance and behavior. The child at return, was weak, lethargic, unable to stand, and wanting to lay down or sit. The child had a hard time walking. Child stated the dad and his parents touched her "crotch" during the visit. The child also told. Julia that she vomited twice, at the grandparents' house. The child appeared drugged, with a pale face and pinpoint eyes, plus her behavior and statements about vomiting could indicate possible intoxication. Julia's friend mentioned it could be drugging, to do sexual abuse, or one or the other. Julia's friend has experience with family members sexually abusing and said something like sometimes they use drugs to inhibit the victims.

06/24/2016

The father was scheduled to bring the child back from visitation today. He stated being at his friend Jeremy Newell's house with the child. The father stated the minor child "Almost" went swimming. Jace and Kaylee are Jeremy Newell's children.

Hows baby girl
9:34 AM

She is good. Do you want me to make a dentist appt for her?
9:52 AM

Today would be a good day to go swimming
9:52 AM

Omg
5:07 PM

Please bring me her shoes

The father brought the child home from visitation. The father mentioned that he had the child at his personal friend's house, and things like the child "almost" went swimming. (show texts)

When the child returned that evening to the mother Julia, the child was immediately humping the couch, and trying to touch Julia's privates. The child avoided going to the bathroom, and also there was a white crunchy substance dried on her underwear. That is never usually present on the child's clothing when she is with the mother. The child seemed withdrawn and so Julia took the child for ice cream, and a car ride. Gordon Pearson also witnessed the child in a distressed state. The child appeared out of it, cross eyed, and was not talking in complete sentences as she was before the visitation. The child mumbled, and uttered sounds instead of speaking words which is a huge developmental reversal. The child is used to talking very well so mumbling and making sounds, was not like the child. The child was also stuttering, while trying to talk instead of talking fluently as she did before visit.
